PROFESSIONAL SUMMARY

Aspiring Data Analyst and Data Science undergraduate with a strong foundation in Python, SQL, Excel, Power BI, Tableau, and machine learning. Skilled in data cleaning, exploratory data analysis, dashboard development, and transforming complex datasets into meaningful business insights. Built multiple analytics and visualization projects using real-world datasets and completed industry-focused training programs in data analytics and AI. Adept at problem-solving, data storytelling, and KPI reporting, with a strong commitment to continuous learning and to delivering data-driven solutions that support informed business decisions.

TECHNICAL SKILLS

Programming Languages: Python, Java, JavaScript, C++, HTML, CSS

Data Analysis & Data Science: Power BI (DAX, Data Modeling, Row-Level Security (RLS), Power BI Service), Power Query (M Language, ETL), Excel (PivotTables, Advanced Formulas), Tableau, SQL, Statistics (Hypothesis Testing, Correlation & Covariance), Data Cleaning, Business Understanding, EDA Process, Linear Algebra, Calculus

Python Libraries: Pandas, NumPy, Matplotlib, Seaborn, Plotly, Scikit-learn, PyTorch

AI & Machine Learning Engineering: Supervised Learning (Regression, Classification, Decision Trees, Random Forest, Bagging, Boosting, Stacking, XGBoost, KNN, SVM, Naïve Bayes), Unsupervised Learning (K-Means, Hierarchical Clustering, DBSCAN, PCA, t-SNE, UMAP, Anomaly Detection, Association Rules), Feature Engineering, Model Evaluation, Cross-Validation & Hyperparameter Tuning, MLOps (Model Deployment, CI/CD for ML, Model Monitoring & Versioning)

AI Automation: N8N Workflow Automation, AI Agents, RAG, MCP (Model Context Protocol), Claude Integration

Web Scraping: Requests, BeautifulSoup, Selenium

Tools: Git, GitHub, Docker, Jupyter Notebook, Google Sheets

EXPERIENCE

Freelance Data Analyst | Remote *Jan 2026 – Present*

- Cleaned and structured raw datasets for 10+ freelance clients, improving data accuracy and reducing reporting turnaround time.
- Built interactive Excel and Power BI dashboards with KPI reports to support business decision-making.
- Performed high-accuracy data entry, validation, and quality assurance across 10+ client projects.

Artificial Intelligence Training | The British University in Egypt – School of Continuing Education *Aug 2026*

- Completed a certified course on Fundamentals and Applications in Artificial Intelligence, covering core AI concepts and their practical use cases.
- Gained foundational knowledge in AI principles and applications relevant to data-driven decision-making.

Data Analytics Trainee | NTI *Jul 2026 – Aug 2026*

- Applied Excel, Power BI, Python, and SQL to clean, model, and analyze structured datasets using Power Query and data modeling techniques.
- Built analytical projects and dashboards that translated raw data into clear, actionable insights across multiple practice datasets.

Data Analytics Trainee | Mazen Analyst *Dec 2025 – May 2026*

- Built KPI and performance analysis dashboards using Excel and Power BI on structured business datasets.
- Delivered analytical reports that supported stakeholders in generating actionable business insights.

PROJECTS

Car Price Prediction Model | Python, Pandas, scikit-learn, Seaborn | GitHub *Oct/2026*

- Cleaned and explored an automobile dataset, handling missing values and analyzing feature correlations (horsepower, engine size, curb-weight) with price
- Built and evaluated simple and multiple linear regression models using scikit-learn to predict car prices, comparing actual vs. predicted distributions

Professional Services Revenue Analytics | SQL Server, Power BI, Dax | GitHub *Oct 2026*

- Built a SQL Server data model — created views joining services and branch data, defined relationships, and validated data integrity with SQL queries.
- Designed an interactive Power BI dashboard with KPIs (Revenue, Hours, Service, Clients), regional breakdowns, and a What-If analysis simulating hourly rate changes on projected profit.

Tanqeeb Job Listings Web Scraper | Python, BeautifulSoup, Requests | GitHub *Oct 2026*

- Developed a Python web scraper that automatically extracts AI Engineer job postings in Egypt (job title, company, location, posting date) from Tanqeeb.
- Structured the scraped data and exported it to CSV/Excel, enabling quick analysis of hiring trends and in-demand roles.

Baladna Production & Distribution Dashboard | Power BI, DAX, Data Modeling, Power Query | GitHub *Aug 2026*

- Built a star schema data model linking Production, Distribution, and Date tables to enable accurate time intelligence and cross-filtering.
- Designed an interactive dashboard tracking 164 products and 31M+ production units across 6 regions, surfacing daily trends and category-level performance.
- Developed KPI cards (Total Production, Average Daily Production, Dispatch Rate) to monitor performance against targets in real time.

Sallah Call Center Performance Dashboard | Excel, Power BI, Data Modeling, Power Query | GitHub *Mar 2026*

- Analyzed call center performance data and built a dashboard to monitor agent-level KPIs.
- Delivered insights supporting operational improvement decisions.

Misuo Sales Analysis Dashboard | Excel, PivotTables | GitHub *Jan 2026*

- Cleaned and transformed raw sales data, improving reporting accuracy.
- Built an interactive dashboard tracking sales KPIs and identifying performance trends.

EDUCATION

B.Sc. in Data Science *Expected Graduation: 2029*
Menoufia National University – Faculty of Computer and Artificial Intelligence
GPA: 3.0 / 4.0

CERTIFICATIONS

Ai & Machine Learning Diploma —London Innovation Academy (120 Training Hours) *Feb 2027*
HCIA-AI V4.0 — Huawei ICT Academy *Oct 2026*
Machine Learning Engineering— Stanford Online | Coursera *Oct 2026*
Google AI Essentials Specialization — Google | Coursera *Sep 2026*
Google Advanced Data Analytics — Google | Coursera *Jul 2026*
Google Data Analytics — Google | Coursera *Jul 2026*

LANGUAGES

Arabic: Native | **English:** Professional
