◆ Objective

Detail-oriented and motivated Data Analyst with hands-on experience in data entry, data cleaning, and building Excel dashboards for reporting and business insights. Skilled in transforming raw data into meaningful visualizations and KPI reports to support decision-making.

Proficient in Python, SQL, Excel, and data visualization tools such as Power BI and Tableau, with a strong foundation in data analysis, machine learning, and data storytelling. Experienced through freelancing and professional training programs, with exposure to real-world datasets and analytical workflows. Passionate about leveraging data to solve business problems and continuously improving technical and analytical skills.

🎓 Education

Menoufia National University – Faculty of Computer and Artificial Intelligence

B.Sc. in Data Science

Expected Graduation: 2029

✂ Technical Skills

Programming Languages:

Python, SQL, Java, JavaScript, C++, HTML, CSS, DAX

Data Analysis & ML:

Pandas, NumPy, Matplotlib, Seaborn, Machine Learning

Data Visualization:

Power BI, Tableau, Excel

Databases:

MySQL, SQL Server

Data Engineering:

ETL, Data Warehousing

Tools & Version Control:

Git, GitHub

Projects

Misuo Sales Analysis Dashboard (Excel)

- Cleaned and transformed sales data to improve accuracy and reporting.
- Built interactive dashboards to track KPIs and sales performance.
- Identified trends and business insights through visualization.

Call Center Performance Dashboard (Excel)

- Analyzed call center performance data.
- Built dashboards to monitor agent performance and KPIs.
- Delivered insights for operational improvement.

Iris Classification – CodeAlpha Internship (Python)

- Built ML classification model using Python.
 - Performed EDA using Pandas, NumPy, Matplotlib.
 - Achieved 95%+ accuracy.
 - GitHub: <https://github.com/kirloshazem-code/codealpha-iris>
-

Experience

Freelance Data Analyst (Remote)

- Performed data entry tasks with high accuracy.
- Built Excel dashboards and reports for clients.
- Cleaned and structured raw datasets for analysis.
- Delivered KPI reports and visual insights.

ITIDA Gigs – Professional Trainee

- Participated in data analysis training program.

- Worked on Excel-based reporting tasks.
- Learned data handling and basic analytics workflows.

CodeAlpha – Data Science Trainee

- Developed ML project (Iris Classification).
- Performed data analysis and visualization.
- Applied Python-based data preprocessing techniques.

Mazen Analyst – Data Analytics Trainee

- Built dashboards using Excel and Power BI.
- Created KPI reports and performance analysis dashboards.
- Worked on structured datasets for business insights.

Certifications

- Data Analysis with Python – freeCodeCamp Data Analysis Essentials – Cisco (2025)
- Introduction to Data Science – Cisco (2025) Python Basics – Mahara-Tech
- Python Level 1 – Cisco Introduction to Modern AI – Cisco (2025)
- Apply AI – Cisco (2025)
- IBM Data Analysis Certificate - Coursera
